Farm Credit Bank of Texas Deploys Crossroads' ReadVerify to Guarantee Backup System's Integrity, Performance and Full Utilization

FCBT Eliminates Inefficient and Sometimes Costly Guesswork From its Daily Tape Backup Operations with Crossroads' ReadVerify Appliance

AUSTIN, Texas – June 19, 2007 – Crossroads Systems, Inc. (OTC Pink Sheets: CRDS.PK), a leading provider of Business Information Assurance (BIA) solutions for guaranteed access, resiliency and security of enterprise information, today announced that Farm Credit Bank of Texas (FCBT), a cooperatively owned wholesale bank with assets of \$12.9 billion, has implemented Crossroads' SurePath™ ReadVerify Appliance (RVA).

With backed up data for more than \$10 billion dollars in loans, FCTB realizes the need to confirm the reliability and efficiency of continuous data backups. Using RVA, a cost-effective, standalone appliance, FCTB can guarantee the integrity, performance and full utilization of backup systems. Proactive alerts detail the performance of tape media and drives for FCBT administrators, allowing them to precisely monitor and manage daily backup snapshots critical to business continuity. Additionally, FCTB can proactively remove tapes that are about to reach their effective end of life before they cause a backup failure.

"By providing us with consistent, accurate data surrounding our backup process and performance, we gain considerable trust in the storage and readability of our tape media – a vital part of ensuring the integrity of our customer information," said Budd Trippet, senior network administrator at FCBT. "Within just 15 minutes of installation, we began to log data through RVA. We find RVA to be an easy-to-install, non-intrusive, and easily-managed solution that arms us with the data we need to properly watch and diagnose our tape backup system, eliminating inefficient and sometimes costly guesswork."

Crossroads' RVA addresses the ever-growing problem of tape backup errors and drive performance. Since government agencies and companies of all sizes are now required to store data for long periods of time, RVA also serves as a proactive mechanism to help verify that information is recoverable from tape media and systems. RVA validates the integrity of the drive/media system while providing historical resource monitoring and reporting, allowing increased backup reliability, maximum tape media usage, and overall cost savings.

RVA's advanced management features include reporting on data such as:

- Real-time tape and drive performance
- Real-time tape and drive utilization
- Tape reliability verification over the life of media

"By drastically reducing the risk of tape backup and recovery errors, Crossroads' RVA plays a vital role in delivering the information organizations need to ensure the reliability and availability of data – potentially saving sensitive financial data, as illustrated through FCTB's recent deployment of RVA," said Greg Reny, executive vice president of sales at Crossroads Systems. "RVA continues to receive ongoing praise from organizations, offering easily-installed, appliance-based technology that provides peace of mind for administrators tasked with managing their backup process."

About Farm Credit Bank of Texas

Farm Credit Bank of Texas, headquartered in Austin, Texas, is a cooperatively owned wholesale bank with assets of \$12.9 billion. FCBT is part of the nationwide Farm Credit System, established by Congress in 1916. Together with its affiliated lending cooperatives, FCBT comprises the \$16.0 billion Tenth Farm Credit District, the single largest rural lending network serving Alabama, Louisiana, Mississippi, New Mexico and Texas.
