FOR IMMEDIATE RELEASE

Crossroads Systems CEO to Speak at Fujifilm's 2010 Global IT Executive Summit

Austin, Texas – February 17, 2010 – Crossroads Systems, Inc. (symbol: CRDS), a global provider of solutions to connect, protect, secure and restore data, today announced that CEO and President Rob Sims will serve as a guest speaker at Fujifilm's Global IT Executive Summit on Thursday, February 25 at the Barton Creek Resort and Spa in Austin, Texas.

An event designed exclusively for Fujifilm's top-tier North American and European customers, the Global IT Executive Summit focuses on critical data protection and the strategic role of advanced nano-technology data tape in a tiered storage environment. The event is keynoted by industry analyst Jon Toigo and features other guest speakers from IBM, Instrumental, the Major League Baseball Network, Ovation Data Services, The StorageIO Group, and the University of Texas at Austin.

Titled, "The Truth about Tape Storage," Sims' session will offer powerful tips on how to improve an existing storage system. Instead of resolving tape problems by replacing tape and hoping the problem goes away, Sims' session outlines four specific areas that cause tape problems: human/natural, drives, the systems, and media. He will show how what is often considered a hassle can shift to a money-saving exercise that solves defects by addressing the root problem.
