FOR IMMEDIATE RELEASE

Crossroads Systems' Chief of Information Strategy and Security to Speak at 2010 TASSCC Technology Education Conference

Austin, Texas – March 10, 2010 – Crossroads Systems, Inc. (symbol: CRDS), a global provider of solutions to connect, protect, secure and restore data, today announced that Anyck Turgeon, Chief of Information Strategy and Security, is scheduled to speak today at the 2010 Texas Association of State Systems for Computing and Communications Technology Education Conference (TASSCC TEC) at the AT&T Conference Center in Austin, Texas.

Turgeon will discuss overcoming today's top data security challenges surrounding cost-reducing virtualization technologies. Her session will outline how to assess true costs, mitigate risk, communicate security specifications, and effectively protect business-critical information. Attendees will be armed with knowledge of architectural gaps and strategies to mitigate today's business challenges related to virtualization through simple, yet often overlooked security architectural considerations that will keep a business performing non-stop.

TASSCC TEC is a one-day event that brings together technology directors from Texas state agencies and institutions of higher education to review specific topics of interest. The purpose of the conference is to drill down on issues that are relevant and timely and provide an in-depth look at the challenges and opportunities related to each subject covered. TASSCC members examine issues, explore future trends, and hear in-depth discussions on topics currently impacting public sector IT.

This year's conference theme is "Results 2.0 – Delivering & Communicating IT's Business Value." TASSCC TEC 2010 will focus on improving output and obtaining results in an increasingly complex and cost-conscious work environment that is quickly becoming more virtualized. For more information on the TASSCC Technology Education Conference, visit www.tasscc.org.

About TASSCC

The mission of the Texas Association of State Systems for Computing and Communications is to advance education and networking among Texas public sector IT professionals. Full members of TASSCC are Texas state agencies and state institutions of higher education, while associate members are primarily companies involved in computing and communications. Participants in TASSCC-sponsored activities typically include information resource managers, information technology executives, information technology staff from member institutions, and other interested people. Visit www.tasscc.org.
